https://github.com/Yashrai54

SKILLS

Technical: JavaScript, NodeJS, ReactJS, C++, MongoDB, PHP, MySQL.

Soft Skills: Problem-Solving, Time Management, Leadership Skills, Team Skills

EDUCATION

Secondary(10th)/Higher Sec(12th)
2020
DAV Sr. Secondary School, Surajpur

BE-CSE
2022-2026
Chandigarh University

CERTIFICATIONS

- Blockchain Technology-Meta crafters
- Flutter Development-Google
- Introduction To AR and VR-Google
- Advanced React Projects and E-commerce Development-Packt
- Successful Negotiation-University of Michigan
- Introduction to RDBMS-IBM
- Innovation through design - University of Sydney

CAREER OBJECTIVE

Motivated, Self-Introspective and a critical thinker CS graduate with strong foundations in various tech stacks including MERN Stack, DSA and always eager to learn new technologies to help make innovative projects that helps the end users.

PROJECTS

Blog Monger
Developed a full-fledged Blogging Website using server-side rendering with EJS and implementing sever side logic with ExpressJS handling database logic with MongoDB.
Learned about the project structure and best practices for implementing projects from scratch.

World Atlas
World Atlas is a React based Webpage made using Geolocation Api and React 19. The site is based on Virtual DOM which is the specialty of React and implements the site with all new changes in the new React Version. Learned about Problem-Solving logics involved in API handling and various routes handling.

Spotify Clone
Spotify Clone is a basic project which uses basic technologies like HTML, CSS and JS involving all the backend logics being handled through JS. This Project helped in building the foundation of web technologies and handling server-side logics on my own without making use of any APIs. It served as the basis for my problem-solving skills and building my passion for software development.
